When U.S. companies invest abroad, does it cost or help support American jobs? Do foreign acquisitions of U.S. companies destroy or sustain American employment? What's the impact on workers?
- **Challenges to global investors in emerging markets, the U.S. and Europe**
How do global investors cope with barriers to investment in emerging markets? What are these countries doing to lure foreign investment? Is the U.S. losing its competitive advantage as a host country?
- **Investing in Green Technologies**
Helping developing countries reduce their carbon output will take massive amounts of investment. How can foreign investors be assured they will have access to these markets, and that they will not be forced to share their technology on disadvantageous terms? How will green growth and foreign investment impact the economies of developing countries?
- **Helping Countries Solve Societal Problems**
What is the most useful and appropriate way for global business to address societal issues? How can the OECD Guidelines for Multinational Enterprises and other instruments assist business in dealing with these issues?
