

BARBARA WANNER

Vice President, ICT Policy

EXPERTISE

- Internet Governance
- Data Privacy
- Big Data
- Internet of Things

PRESENTATION TOPICS

- **Internet Governance in the Digital Economy** - A perspective on the need for a multistakeholder model of Internet governance to preserve and promote private sector innovation, investment and competition
- **The Internet of Things** - An intriguing analysis of an increasingly connected world as the Internet evolves from a network of connected people to a networked society (as objects, devices and things connect to the world around them)
- **Key Challenges in Data Privacy** - An examination of the unprecedented challenges faced in ensuring that privacy regulations do not prove overly burdensome to business operations, hamper innovation or impede legitimate cross-border data flows
- **An Insider's View on Big Data** - Insight and analysis of the issue of ever growing and increasingly complex data sets and the task of capturing, curating and managing the data

BIO

Barbara Wanner directs USCIB's work on information, communications and technology issues. In that capacity, she works with members and government officials on a wide range of international business issues that include: advocating for the continuation of the multistakeholder model of Internet governance and for policies aimed at promoting the stability, openness and innovative flexibility of the Internet; promoting privacy and security regulations that are grounded in risk management and enhance user trust; and pressing for the conclusion of trade agreements that foster cross-border flows of data and maintain open markets for ICT products and services. By working through USCIB's international affiliations and directly with the U.S. government, Wanner provides an American business perspective at international negotiations on ICT issues. She represents USCIB members' interests in several international forums, including the UN, APEC and the OECD. Prior to joining USCIB, Wanner served as director of the Global Services Summit at the Coalition of Service Industries (CSI), where she planned all aspects of CSI's annual international summit and staffed CSI's ICT working group. Wanner has also held positions at the U.S. Asia Pacific Council of the East-West Center, the International Electronics Manufacturers and Consumers of America, the Japan Economic Institute and on Capitol Hill. She holds a master's degree from Columbia University and a bachelor's degree from Bucknell University.
